ACKNOWLEDGEMENT

“For any successful work, it owes to thank many”

No one walks alone & when one is walking on the journey of life just where you start to thank those that joined you, walked beside you & helped you along the way.

Over the years, those that I have met & worked with have continuously urged me to write a book, to share me knowledge & skills on paper & to share my insights together with the secrets to my continual, positive approach to life and all that life throws at us. So at last, here it is.

So, perhaps this book & it's pages will be seen as “thanks” to the tens of thousands of you who have who have helped to make my life what is today.

Hard work, knowledge, dedication & positive attitude all are necessary to do any task successfully but one ingredient which is also very important than others is co-operation & guidance of experts & experienced person.

All the words is lexicon futile & meaningless if I fail to express my sense of regard to my parents & sister for their sacrifices, blessings, prayers, everlasting love & pain & belief in me.

I also want to thanks my friend **Ankit, Ankur & Sonal** for their support.

I solely claim all the responsibility for any shortcomings & limitations in this book.

How to recall sent mails from Gmail

- First Login into your Gmail Account.
- Go to setting option and find the **Labs** option.

- Then go to Undo Send option and enable it. Then click on Save Changes.
- Then go to compose Mail. And send mail.
- By default, Gmail gives you a 10-second window of time in which you may undo a sent e-mail

if you want the send mail back then go to undo option . Your sending mail will be back

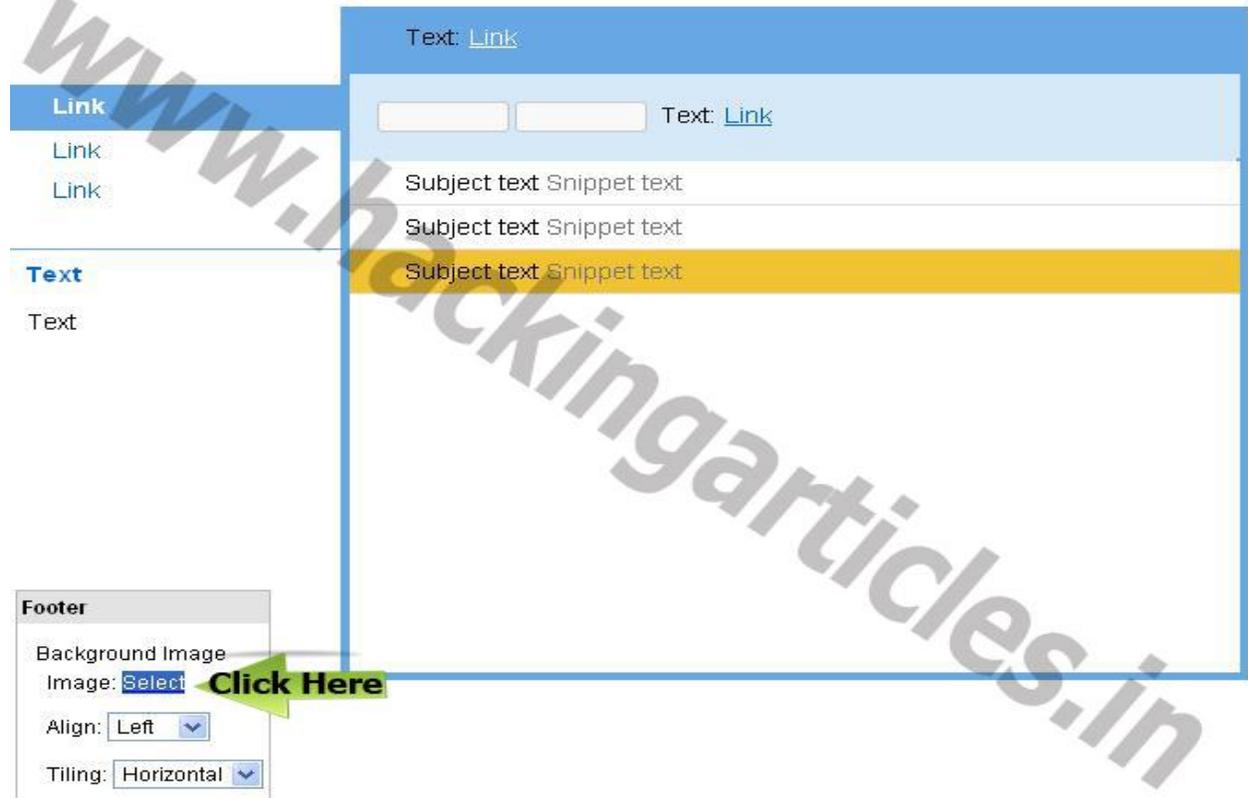

Insert Your Image in Gmail Background

- Log in to your Gmail account and click on settings
- In the settings page click on themes tab
- In themes scroll down to the end of the page and click on “Create your own theme”.

A new pop up window will open. There you can select your own color combinations for your inbox and a background image for the theme.

Choose Your Image

- When you are done just click on the “save” button and then “close”.
- Now you can see your own custom theme in action in your Gmail account.

Open Multiple Account in Same Browser

First, Open Gmail Account. Then, Go to Account Setting.

Change account settings:

Click Here

[Change password](#)
[Change password recovery options](#)
[Other Google Account settings](#)

Then, Go to Personal Setting and click on option (Multiple Sign)

Personal Settings

Security	Changing your password Recovering your password Using 2-step verification Authorizing applications & sites
Dashboard	View data stored with this account
Email addresses	zifovs@gmail.com (Primary email) Edit
Multiple sign-in	Off - Edit Click Here
Connected accounts	View and manage your accounts from other services

Now, Click on (on) option and (all the below check box) And then Click on (Save Option)

Sign in to multiple Google Accounts

On - Use multiple Google Accounts in the same web browser.

Click Here

Select each of the checkboxes below to confirm you understand how to use multiple sign-in:

- The account you're currently using is displayed at the top of most Google product pages, or at the bottom of most pages on mobile devices. Always check to make sure you're using the account you want.
- Not all Google products support multiple sign-in. When switching between Google products, the account you're currently using may change.
- Google products not listed above will default to the first account that you signed in to using your current web browser session.
- Offline Mail and Offline Calendar will be disabled. You may lose any unsent mail. [Learn more](#)

[Learn more](#) about other ways to use multiple accounts with Google products.

Off - Use one Google Account at a time.

You may need to sign out of all accounts for this setting to take effect.

Now, you can sign into multiple Accounts

How to Delete Email Account

- Sign in to your Gmail account.
- Click on your name or email address at the top of the page, and then select **Account settings** from the drop-down menu.
- In the "My products" section, click the **Edit**.

Integrate Facebook, Twitter in gmail

Login Your Gmail Account

To add Facebook, Twitter, in Gmail you have to enable “Add URL by Gadgets” functionality in Gmail from Gmail labs.

Go to Labs

When you click on Save Changes it reloads Gmail again. Now click on settings.

Now from here we can add Facebook, Twitter, to Gmail. If you want to add Facebook then copy and paste

“<http://hosting.gmodules.com/ig/gadgets/file/104971404861070329537/facebook.xml>

<https://twittergadget.appspot.com/gadget-gmail.xml>

Gadgets **www.hackingarticles.in**

You have no gadgets installed.

Add a gadget by its URL:

Gadgets **www.hackingarticles.in**

Facebook by [iBuno](#)
<http://hosting.gmodules.com/ig/gadgets/file/104971404861070329537/facebook.xml>
Add the Facebook Gadget to your iGoogle homepage and get all your friends' updates in real time, set your Status and perform most tasks directly from iGoogle. It works with most browsers and it can expand to full-screen (canvas) view.

Add a gadget by its URL:

Most Contacted Email Addresses in Gmail

- Open your Gmail Inbox and click the Contacts link in the sidebar.
- Click the Export button and choose the “Most Contacted” option in the drop-down to export all those email address in a single CSV file.
- Save this file to a safe location as you might need it if your Gmail Account is hacked.

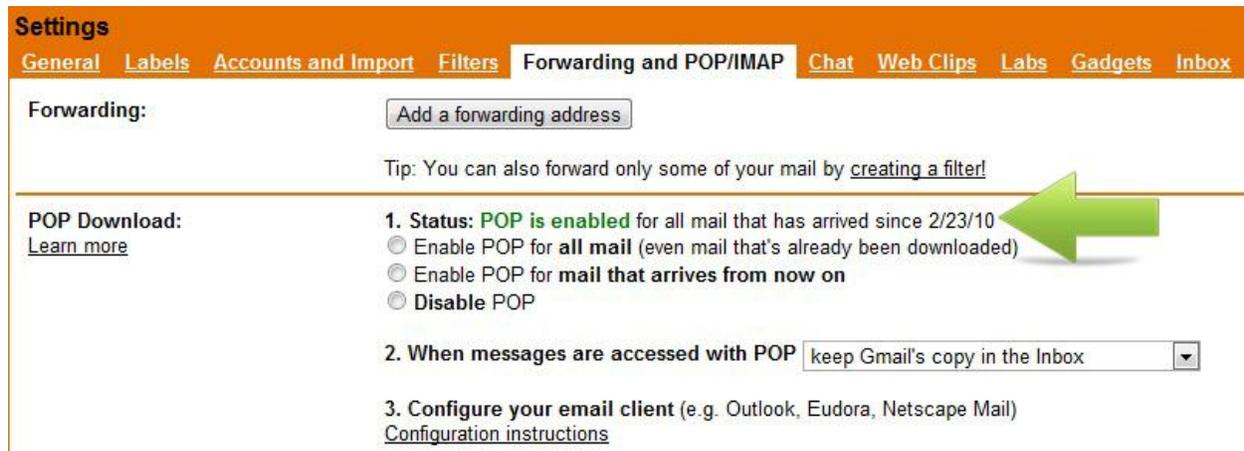

How to find Gmail account creation date

1st sign in your gmail account

Go to Settings -> Forwarding and POP/IMAP and under **POP Download**

Status: POP is enabled for all mail that has arrived since YOUR DATE.

Gmail Goggles

Gmail Labs provides an interesting feature to prevent you from sending mails that may you may regret later. It does so by asking you to confirm whether you really want to send that email.

$7 \times 3 =$
 $11 \times 8 =$
 $72 - 31 =$

Mail Goggles

by Jon P

Google strives to make the world's information useful. Mail you send late night on the weekends may be useful but you may regret it the next morning. Solve some simple math problems and you're good to go. Otherwise, get a good night's sleep and try again in the morning. After enabling this feature, you can adjust the schedule in the "General" settings page.

Enable
 Disable
[Send feedback](#)

When you send an email during your specified time, it prompts you with various mathematical equations which you have to solve before it will send out your email. If you're too out of it to fire up the calculator, your email will have to wait till another day.

Mail Goggles: Select the days and times when you're likely to need Gmail to step in and double check that you want to send that email.

Sunday
 Monday
 Tuesday
 Wednesday
 Thursday
 Friday
 Saturday

From to

Difficulty (higher is harder)

Mail Goggles ✕

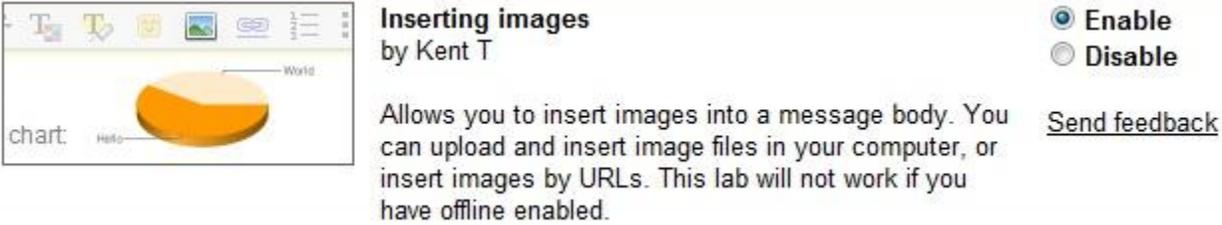

It's that time of day. Gmail aims to help you in many ways. Are you sure you want to send this? Answer some simple math problems to verify.

$91 - 40 =$
 $17 + 22 =$
 $28 + 8 =$
 $85 - 21 =$
 $56 - 25 =$

57 seconds

Insert Image in Gmail Mail

1. Go to your Gmail page
2. in the top right side of the Gmail page, click on "Settings"
3. In the Settings box that opens, click on "Labs."
4. Scroll down the list of options until you come to "Inserting images." (It was a long way down on my system.)
5. Click "Enable."

Inserting images
by Kent T

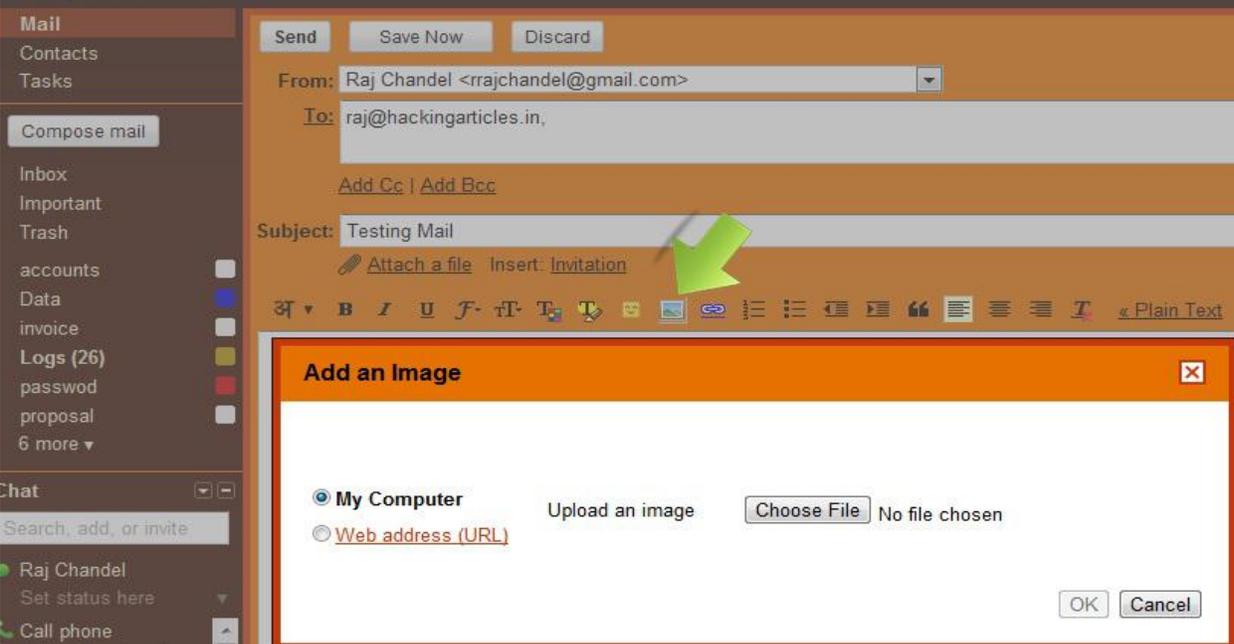

Enable
 Disable

[Send feedback](#)

Allows you to insert images into a message body. You can upload and insert image files in your computer, or insert images by URLs. This lab will not work if you have offline enabled.

6. At the bottom of the page, click the button "Save changes."
Now you are set up to insert images into an email message.

1. Open Gmail to compose a message.
2. Click on this icon and you will get a box that gives you the option to either browse on your computer to get an image file to upload or to enter the URL of an image file located on the Internet.

How to Delete Automatically Spam Message

- Sign in your gmail account with your email id and password
- Click on “Mail Settings” link from the top-right corner
- Click on “Filter” tab

Now click on “Create a New Filter”

The following filters are applied to all incoming mail:

Matches: from:(notify@bitsdujour.com) to:(notify@bitsdujour.com)
Do this: Skip Inbox, Delete it

[Create a new filter](#)

At the “Has the words” box, put is:spam and click “Next Step” then one pop up will open click on “OK”

Choose search criteria Specify the criteria you'd like to use for determining what to do with a message as it arrives. Use “Test Search” to see which messages would have been filtered using these criteria. Messages in Spam and Trash will not be searched.

From:

To:

Subject:

Has the words:

Doesn't have:

Has attachment

[Show current filters](#)

Now check into the box “Delete it”

Choose action - Now, select the action you'd like to take on messages that match the criteria you specified. When a message arrives that matches the search: is:spam, do the following:

- Skip the Inbox (Archive it)
- Mark as read
- Star it
- Apply the label:
- Forward it to: [Manage your forwarding addresses](#)
- Delete it
- Never send it to Spam
- Always mark it as important
- Never mark it as important

[Show current filters](#)

Also apply filter to 9 conversations below.

Finally, click on “Create Filter”

Gmail Shortcuts

1. Go to your Gmail page
2. in the top right side of the Gmail page, click on "Settings"

Enable Keyboard shortcuts on

Keyboard shortcuts:

Search your emails without login Gmail

Greplin allows you to search your emails without having to login to your Gmail. Other than Gmail, it also supports Google Docs, LinkedIn, Facebook, Twitter, Drop box, and many more applications. All you need to do is to link up all your accounts with Greplin and you will be able to search them all in one place.

First Create Account in www.greplin.com

The screenshot displays the Greplin search interface. At the top, there is a search bar with a magnifying glass icon and the text 'greplin'. Below the search bar, it indicates 'Currently indexing 47 documents'. A search filter dropdown is set to 'rr'. The results section shows 'Found Messages (45) for rr:' and a list of three messages:

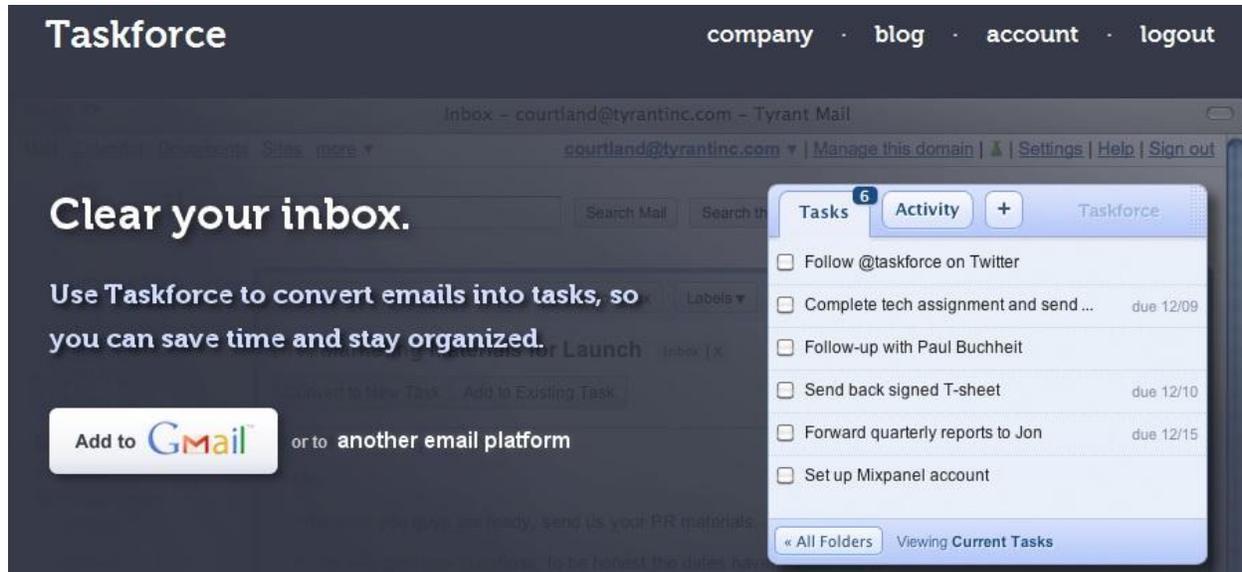

- Messages** (12:34 PM): Thanks for registering for Greplin! Greplin Support, rrajchandel@gmail.com. Hi rrajchandel@gmail.com! Thanks for signing up for Greplin! You can login and begin searching your data immediately. It may take a while to totally index all of your
- Messages** (12:34 PM): Enable your Greplin account Greplin, rrajchandel@gmail.com. Welcome to Greplin! Click here to activate your account.

Convert Your Email into Task

Taskforce is a Gmail extension that converts your emails into tasks and allows you to manage your tasks right within your inbox.

1. Go to the www.taskforceapp.com and login with your Gmail address.
2. Grant it permission to access your inbox.
3. Install the extension for your browser (Firefox, Chrome and Safari).

www.taskforceapp.com

How to Track Mail

Read Notify is the original tracking service of its kind, and remains the most powerful and reliable email and document tracking service in the world today. In short – Read Notify tells you when your tracked emails and documents are opened / re-opened / forwarded and **so** much more.

First sign up in www.readnotify.com

The screenshot shows the ReadNotify.com homepage. On the left, there's a large graphic that says "track your email" with a circular arrow. The main content area has a "Welcome to ReadNotify.com !" message, followed by text explaining the service: "ReadNotify lets you know when email you've sent gets read" and "Ensured Delivery You can request guaranteed proof of exactly when they opened your email". On the right, there's a "Member Sign-in" section with input fields for "email:" and "password:", a "Sign-in" button, and a "Sign up now - Free!" section with a "GO!" button. At the bottom, there are navigation links: "home", "about Re@dNotify", "business solutions", and "member utilities".

Register there.

Once registered, send a mail to your victim by the email id you registered at readnotify.com

But before sending the mail just add “.readnotify.com” with the victims id.. for example

xxxx@gmail.com.readnotify.com

And then send it.

The screenshot shows an email composition window. The "From:" field contains "raj chandel <raj@hackingarticles.in>". The "To:" field contains "<xxxx@gmail.com.readnotify.com>". The "Subject:" field contains "Testing Mail". In the bottom right corner of the composition area, the "www.hackingarticles.in" logo is visible.

Check Your Mail Inbox for Read Notification Details.

Online Email Tracer

EmailTracer is a tool to track email sender's identity. It analyzes the email header and gives the complete details of the sender like IP address, which is key point to find the culprit and the route followed by the mail, the Mail Server, details of Service Provider etc. EmailTracer traces up to Internet Service Provider level only. Further tracing can be done with the help of ISP and law enforcement agencies. The message-id will be useful for analyzing the mail logs at ISP.

Remove Side bar ADS in Gmail

Rapportive is a free Gmail extension that replaces Google sidebar ads with practical social networking information about your contacts.

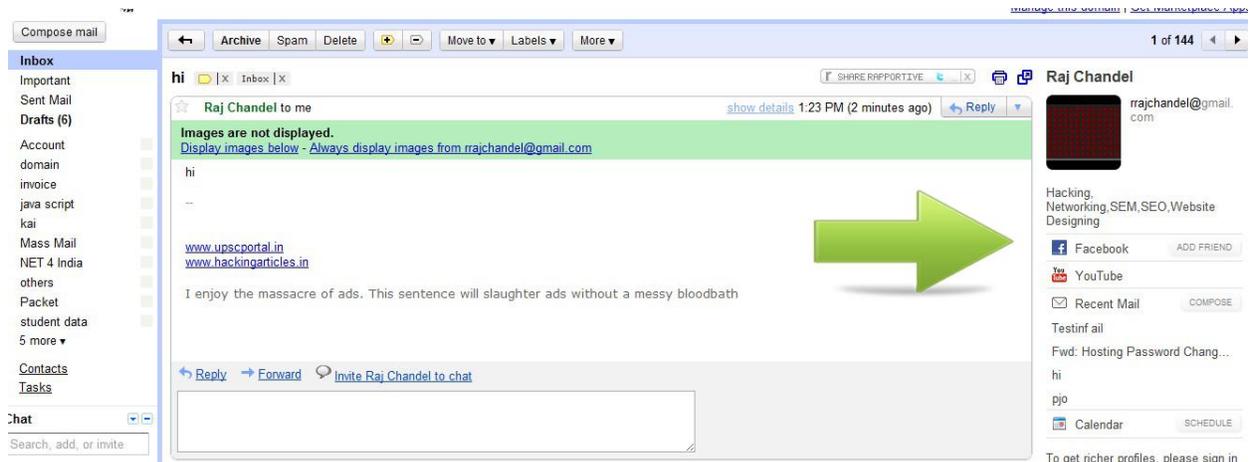

Visit www.rapportive.com and click on the “Add Rapportive to Gmail” link to begin downloading.

Once installed, head back to Gmail (refresh, if need be) and click into any email to see your sender’s social data in the sidebar

Before adding Rapportive:

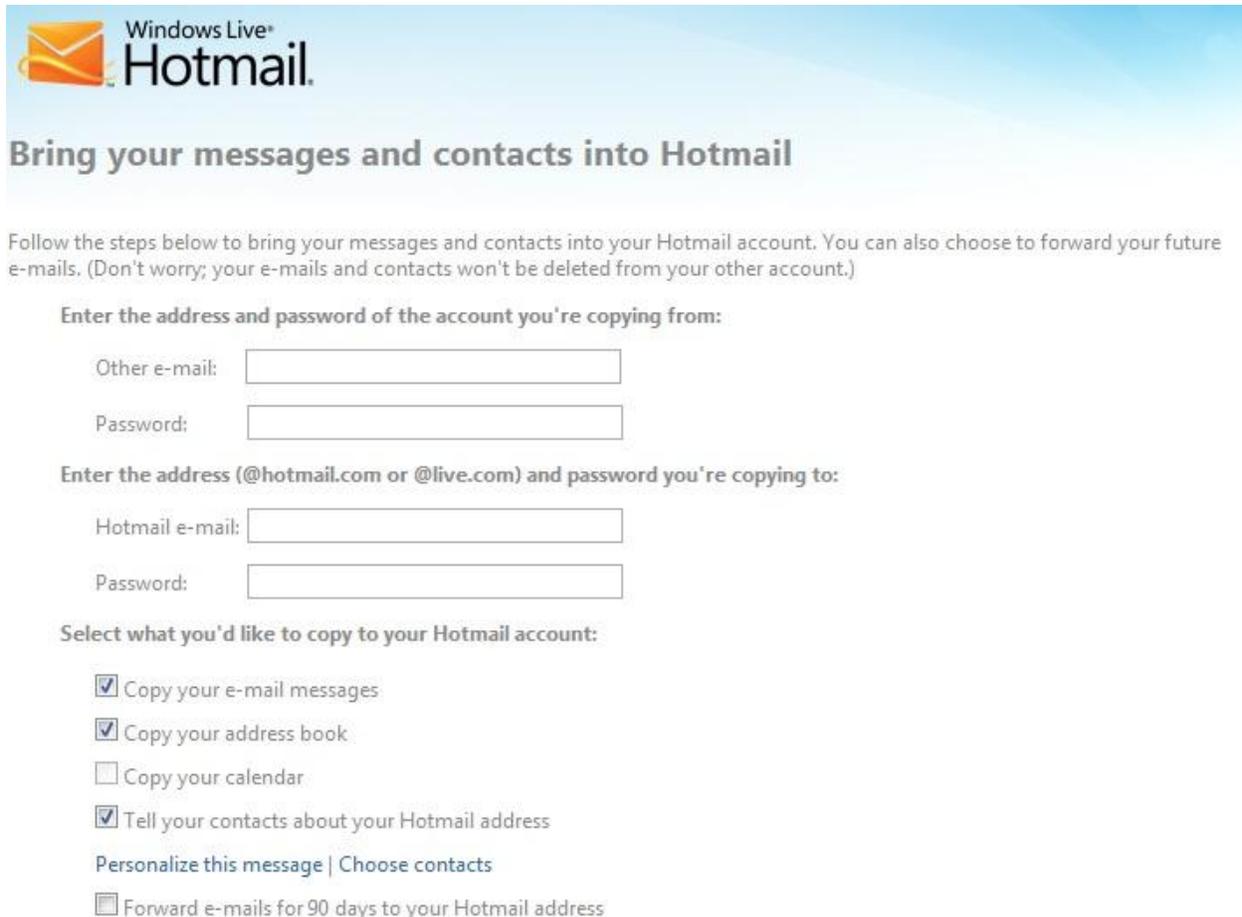

After Adding Rapportive

True Switch

True Switch is a Windows Live product for you to bring your messages and contacts from other mail services into your Hotmail account.

Just enter the address and password of your Gmail and Hotmail accounts, and then you can back up all your inbox and archived Gmail emails to your Hotmail account, from the oldest to the latest, the backup ones will appear immediately.

The screenshot shows the 'Bring your messages and contacts into Hotmail' page. It features the Windows Live Hotmail logo at the top. Below the title, there is a paragraph of instructions. The form is divided into three sections: 1. 'Enter the address and password of the account you're copying from:' with input fields for 'Other e-mail' and 'Password'. 2. 'Enter the address (@hotmail.com or @live.com) and password you're copying to:' with input fields for 'Hotmail e-mail' and 'Password'. 3. 'Select what you'd like to copy to your Hotmail account:' with a list of checkboxes: 'Copy your e-mail messages' (checked), 'Copy your address book' (checked), 'Copy your calendar' (unchecked), 'Tell your contacts about your Hotmail address' (checked), and 'Forward e-mails for 90 days to your Hotmail address' (unchecked). There are also links for 'Personalize this message' and 'Choose contacts'.

Windows Live®
Hotmail.

Bring your messages and contacts into Hotmail

Follow the steps below to bring your messages and contacts into your Hotmail account. You can also choose to forward your future e-mails. (Don't worry; your e-mails and contacts won't be deleted from your other account.)

Enter the address and password of the account you're copying from:

Other e-mail:

Password:

Enter the address (@hotmail.com or @live.com) and password you're copying to:

Hotmail e-mail:

Password:

Select what you'd like to copy to your Hotmail account:

- Copy your e-mail messages
- Copy your address book
- Copy your calendar
- Tell your contacts about your Hotmail address

[Personalize this message](#) | [Choose contacts](#)

Forward e-mails for 90 days to your Hotmail address

Save your friends from outdated email

START THE INTERVENTION

.....

You've probably already improved the lives of your friends and family members by helping them switch to Gmail, but what about that one friend who still hasn't made the switch? It's time to take a stand and stage an intervention.

.....

Don't worry. We'll help you out.

<http://www.emailintervention.com/>

Send Mail in Your Mobile

- First **Sign up** an account with way2sms.com
- After Signup you will get a confirmation code on the Mobile to prove your Authentication, if you verify the code your account will be activated.
- Login to your account in way2sms.com
- After that Go to Mail Alerts Section, which is just located besides, see the bellow image.

There is an option called as Activate the Mail Alerts. Just click on Activate button to Activate the Mail alerts on your Mobile phone.

Receive instant free email alerts on your mobile. Get mail alerts on mobile for your Yahoo & Gmail accounts.

Don't miss important mails just because you're away from the PC. Get SMS alerts on your mobile phone as and when the new Mail arrives. You'll receive alerts when you want them. Link your existing Yahoo, Gmail and other email accounts with Way2SMS account and get instant Free SMS alerts for your Yahoo, Gmail accounts too. Way2SMS delivers an alert on your mobile whenever an email hits your gmail or yahoo inbox. You can link your other mail accounts too.

 Mail Alert Status : **Not Activated**
On Mobile : 919...6 [Click Here to Activate](#)

Click Here

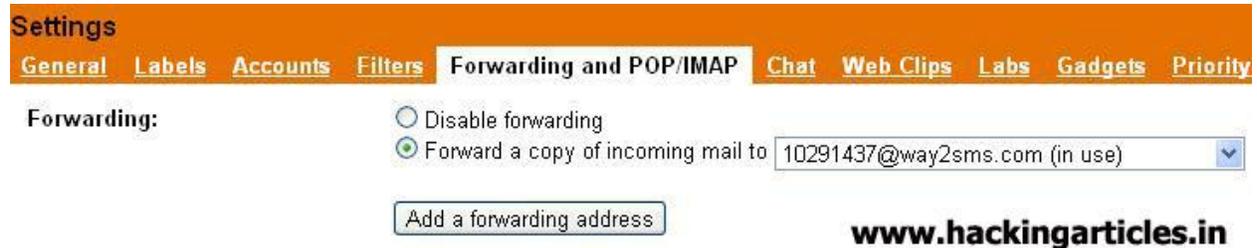

Preferences **Activation**

Time Settings

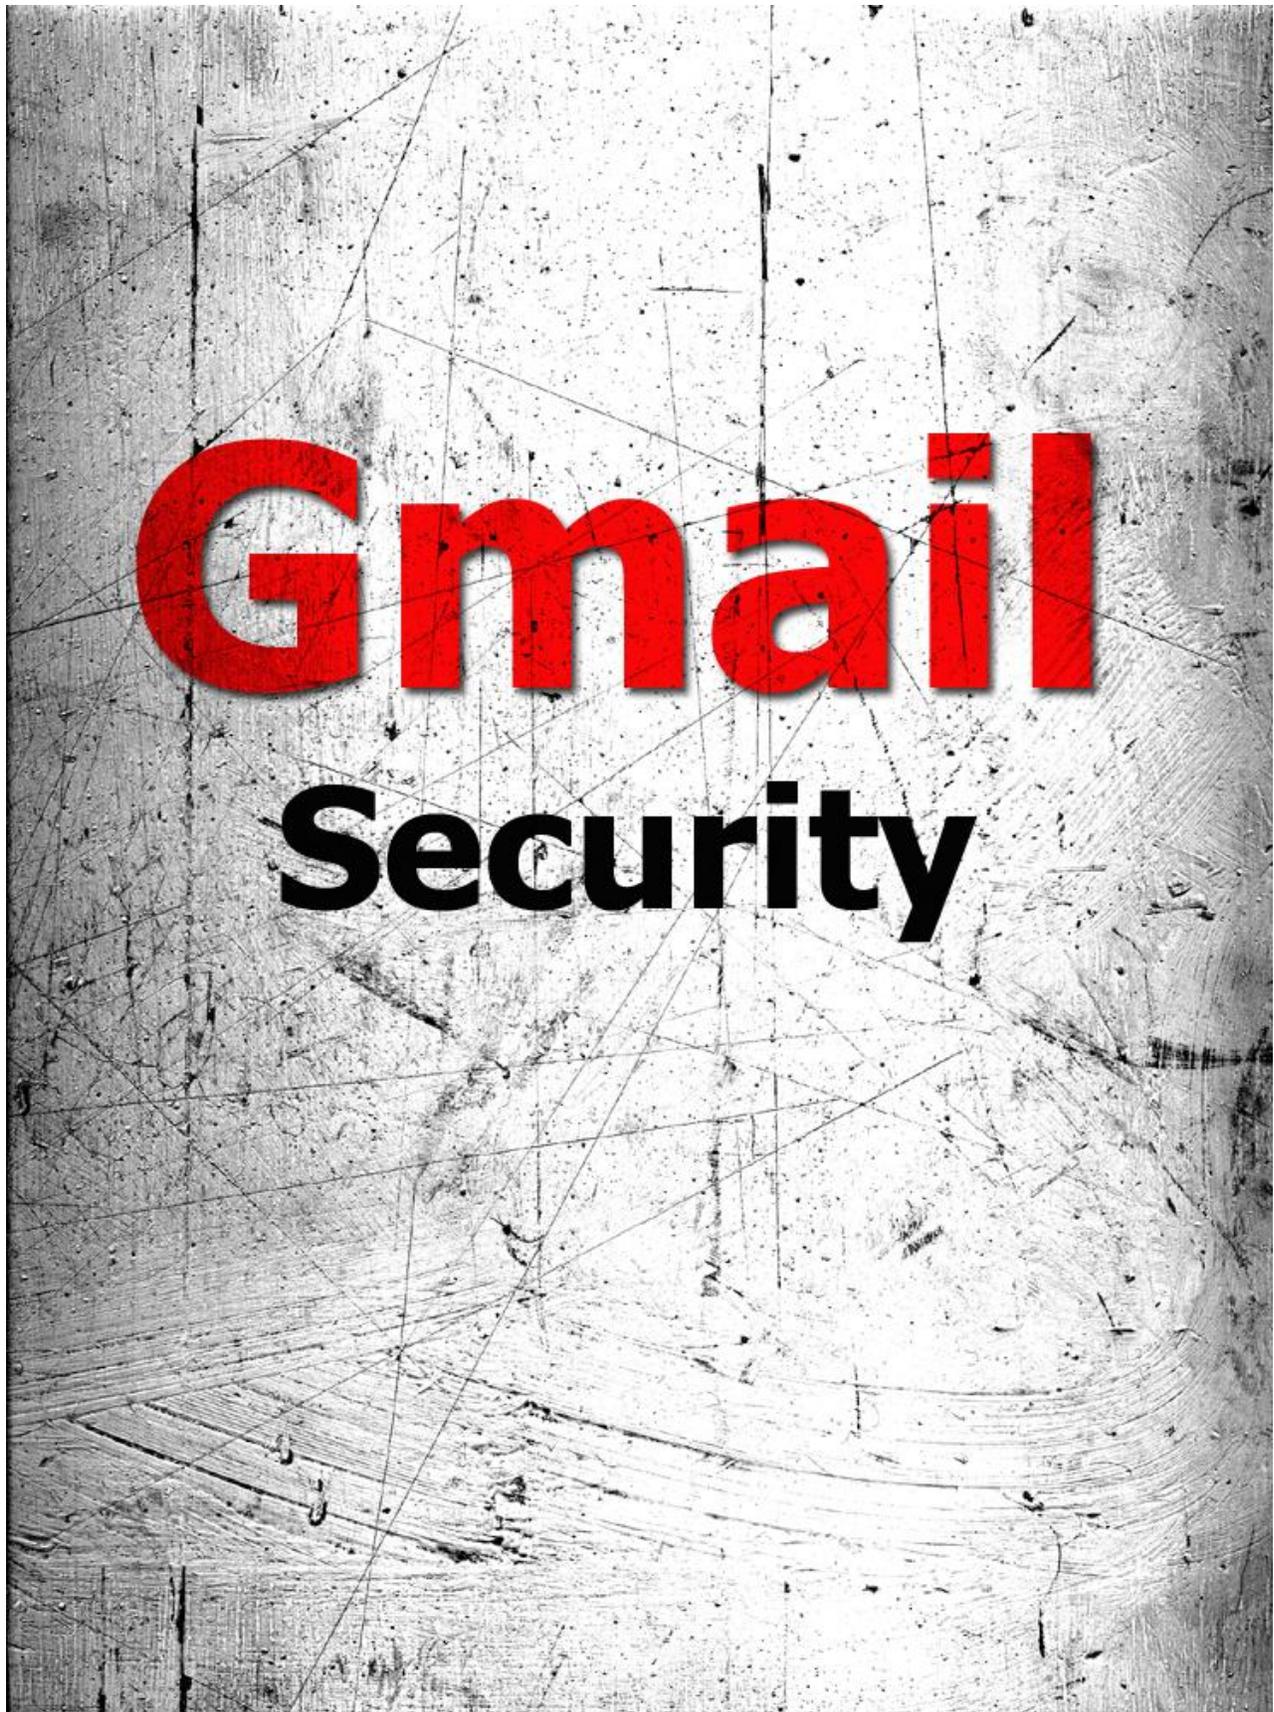

All 7 days Round the clock

Note : Way2SMS mail alert service works only with mail box that has forward option.

- Login to your Gmail account
- Click on settings & then click on 'FORWARDING/POP/IMAP' option
- Select 'Forward a copy of incoming mail to' option & Enter your Way2SMS Email **ID10291437@way2sms.com** there.

- Gmail sends a verification code to **10291437@way2sms.com**.
- You will receive gmail confirmation mail alert on your mobile with subject line containing confirmation code.
- Copy and paste the verification code in Gmail verification box. Click On Verify.
- Finished. You will now receive alerts for every incoming mail that arrives in your gmail id.

How to find if Your Gmail account is Hacked

- Login Your Gmail Account
- At the bottom of your Gmail inbox there is a **'Last Account Activity'** section. Click on 'details' to launch the full blown monitor.

You are currently using 99 MB (1 %) of your 7593 MB.

Last account activity: 5 minutes ago at this IP (121.245.46.114). [Details](#)

How to protect your gmail account from getting hacked

1. Go to your Gmail page
2. in the top right side of the Gmail page, click on "Settings"

Then at the bottom of the general settings page, select the "Always use https" option, and click the Save Changes button.

Browser connection:

[Learn more](#)

- Always use https
 Don't always use https

Use KeyScrambler to protect yourself from KeyLoggers

Keyloggers are little programs that can even pass through your security software at times. They are a nightmare since they send back all information you type back to the person who wrote the virus. So anytime when you type your password, the hacker would get access to it.

<http://www.qfxsoftware.com>

Gmail account security with 2-step verification

Login Your Gmail Account

You can enable 2-step verification through a new link on your Account Setting Page

Security  [Changing your password](#)
[Recovering your password](#)
[Using 2-step verification](#)
[Authorizing applications & sites](#)

How to Trace Sender Information

- Log in to your Gmail account.
- Now open any email from your inbox (or the one you want to track the location)
- Click the "**Show original**" link on right bottom part.

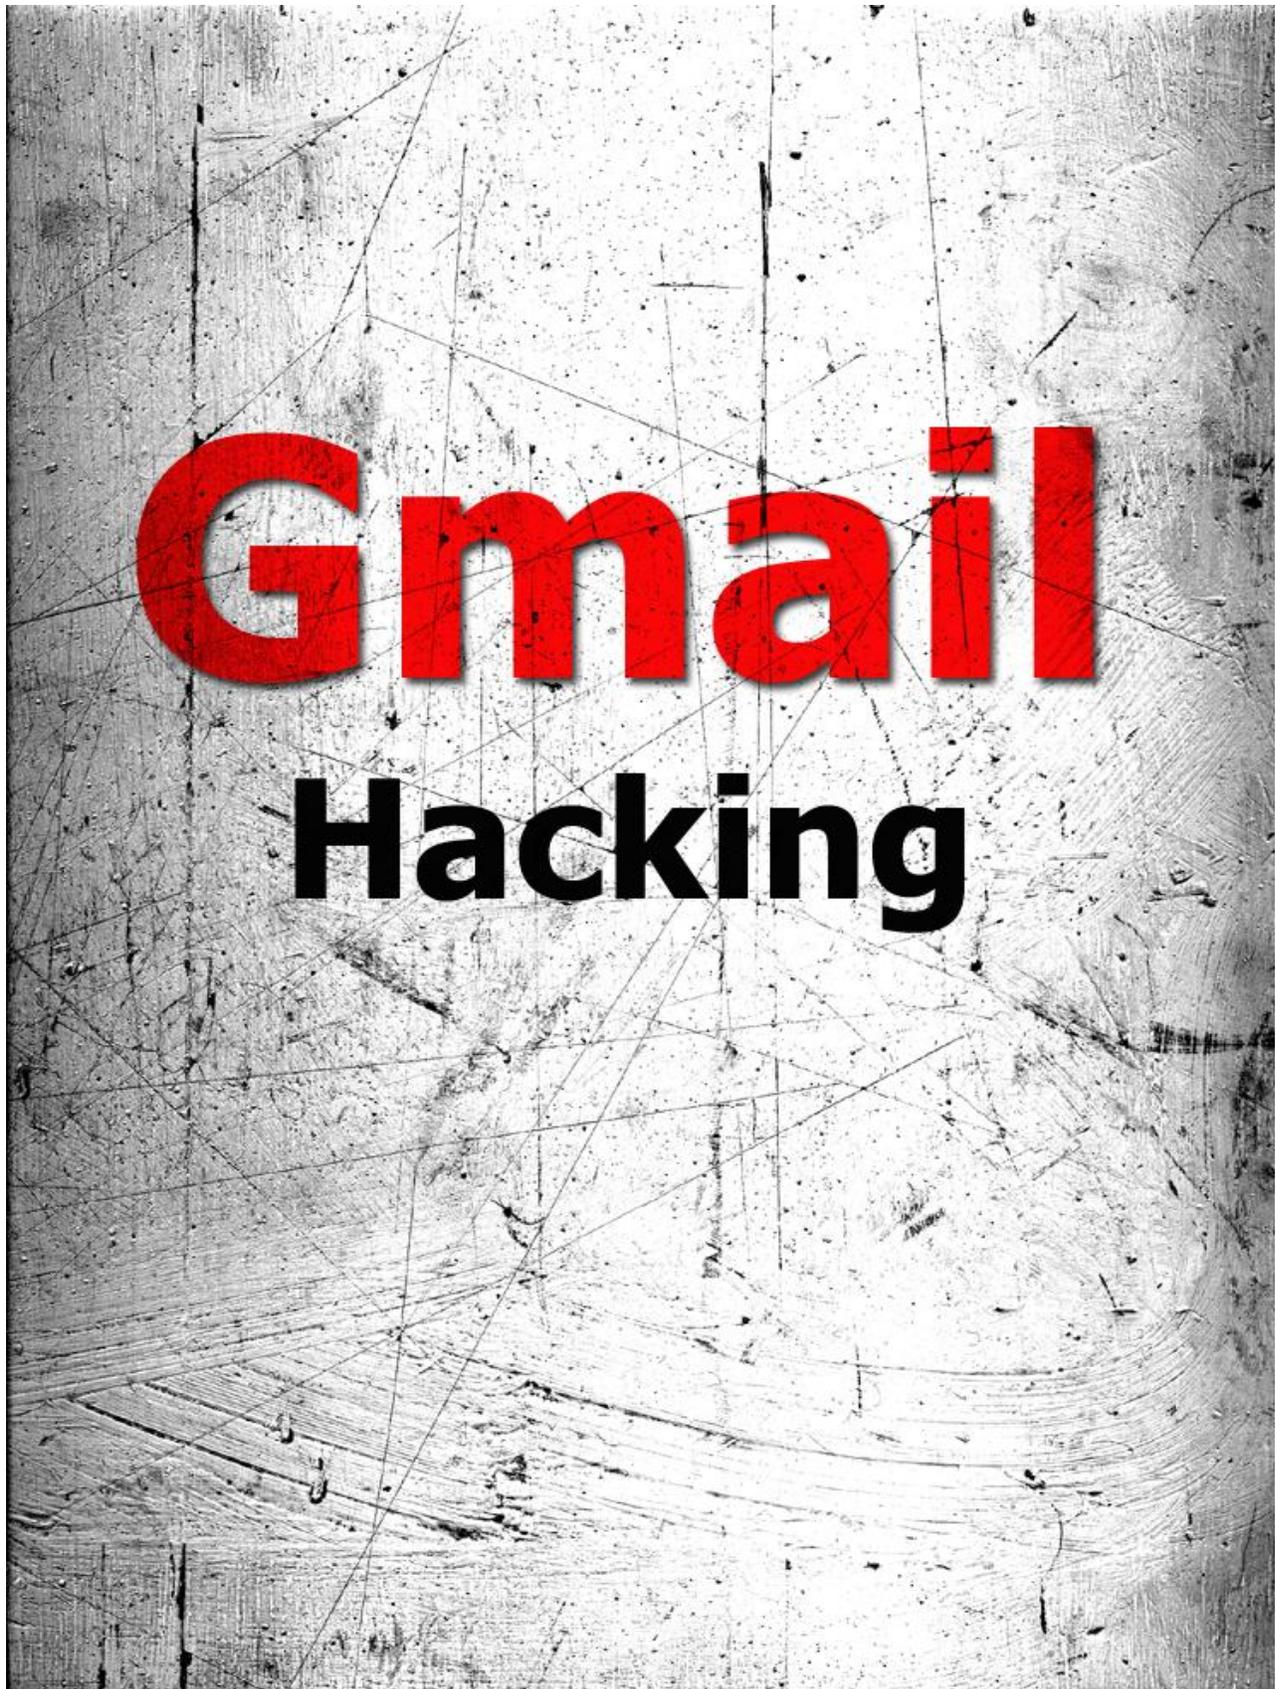

- Look for "Received: from" Received: from [14.98.45.113] by rajhackingarticle@yahoo.com
- [14.98.45.113] can be different for every mail, as this is the IP address of the sender.
- Now to trace the sender using this ip.

Open this Site: www.aruljohn.com/track.pl

ENTER IP ADDRESS TO TRACE

<input type="text" value="14.98.45.113"/> <input type="button" value="start tracking"/>	
IP address	14.98.45.113
Hostname	Static-113.45.98.14.tataidc.co.in

How to Hack Gmail Account (Phishing)

First of all download the Gmail Phisher.

<http://goo.gl/SfpEq>

Extract the zip file now you will get three files as given below:

- **index.html**
- **log.txt**
- **login.php**

Upload all the three files to any of the free Web hosting server. Some Free Web hosting servers are given below you can also find few more for yourself.

<http://www.yourfreehosting.net/>

<http://www.esmartstart.com/>

<http://www.110mb.com/>

<http://www.drivehq.com/>

<http://www.t35.com/>

	Name
	index.html
	log.txt
	login.php

Once you have uploaded all the three files to web hosting server now you have to send these (<http://hackingarticles.in/gmailph/index.html>) to your victim.

Now After sending Phisher to victim, once the user logs in to his Gmail account using your Phisher, his user ID and password are ours...And these are stored in log.txt what you have to do is just refresh your Web hosting account files.

```
ltmpl=default
ltmplcache=2
continue=http://mail.google.com/mail/?
service=mail
rm=false
Email=rajchandel
Passwd=hackedpassword
rmShown=1
signIn=Sign in
```

How to Hack Gmail Password Using Gmail Hacker

First Download Gmail Hacker from <http://goo.gl/oQNgd>

Enter your email ID and your password and select the option build

Now send the Gmail hacker file to victim tell him that this software is to hack Gmail password. Ask him to fill all the information required in it and then click on to Hack them.

As he will select the “**Hack them**” option he will get an error. And you will get his Email Id and Password on your mail.

Someone wants to share something with you!  |  Inbox |

Hack Gmail Account password with Key Logger

First Download Rin Logger from <http://goo.gl/ruV2J>

Run the keylogger file on your pc and click on “Create new”

Now, enter the information as follows:

Email address: your email address (gmail recommended)

Account Password: Password of your Email address.

Keylogger Recipients: Enter your Email address

Click on next

Now Enable the **Attach Screenshots** by hitting on it. Enter the duration (time in minutes) to receive email Key logs. After that hit "verify now" If you get a message saying verified, your good to go, click next

Now enable the “Install Keylogger” by clicking on it.
Name the file anything you want and select Installation path as “Application Data”, click next

Click on Next

Now, “Enable Website Viewer” by clicking on it.
Click on Next option.

Now, Enable the “Enable File Binder”.
Click on next.

Now Enable the “Steal Password”
Click on Next

Fill all the information by yourself. And click on next.

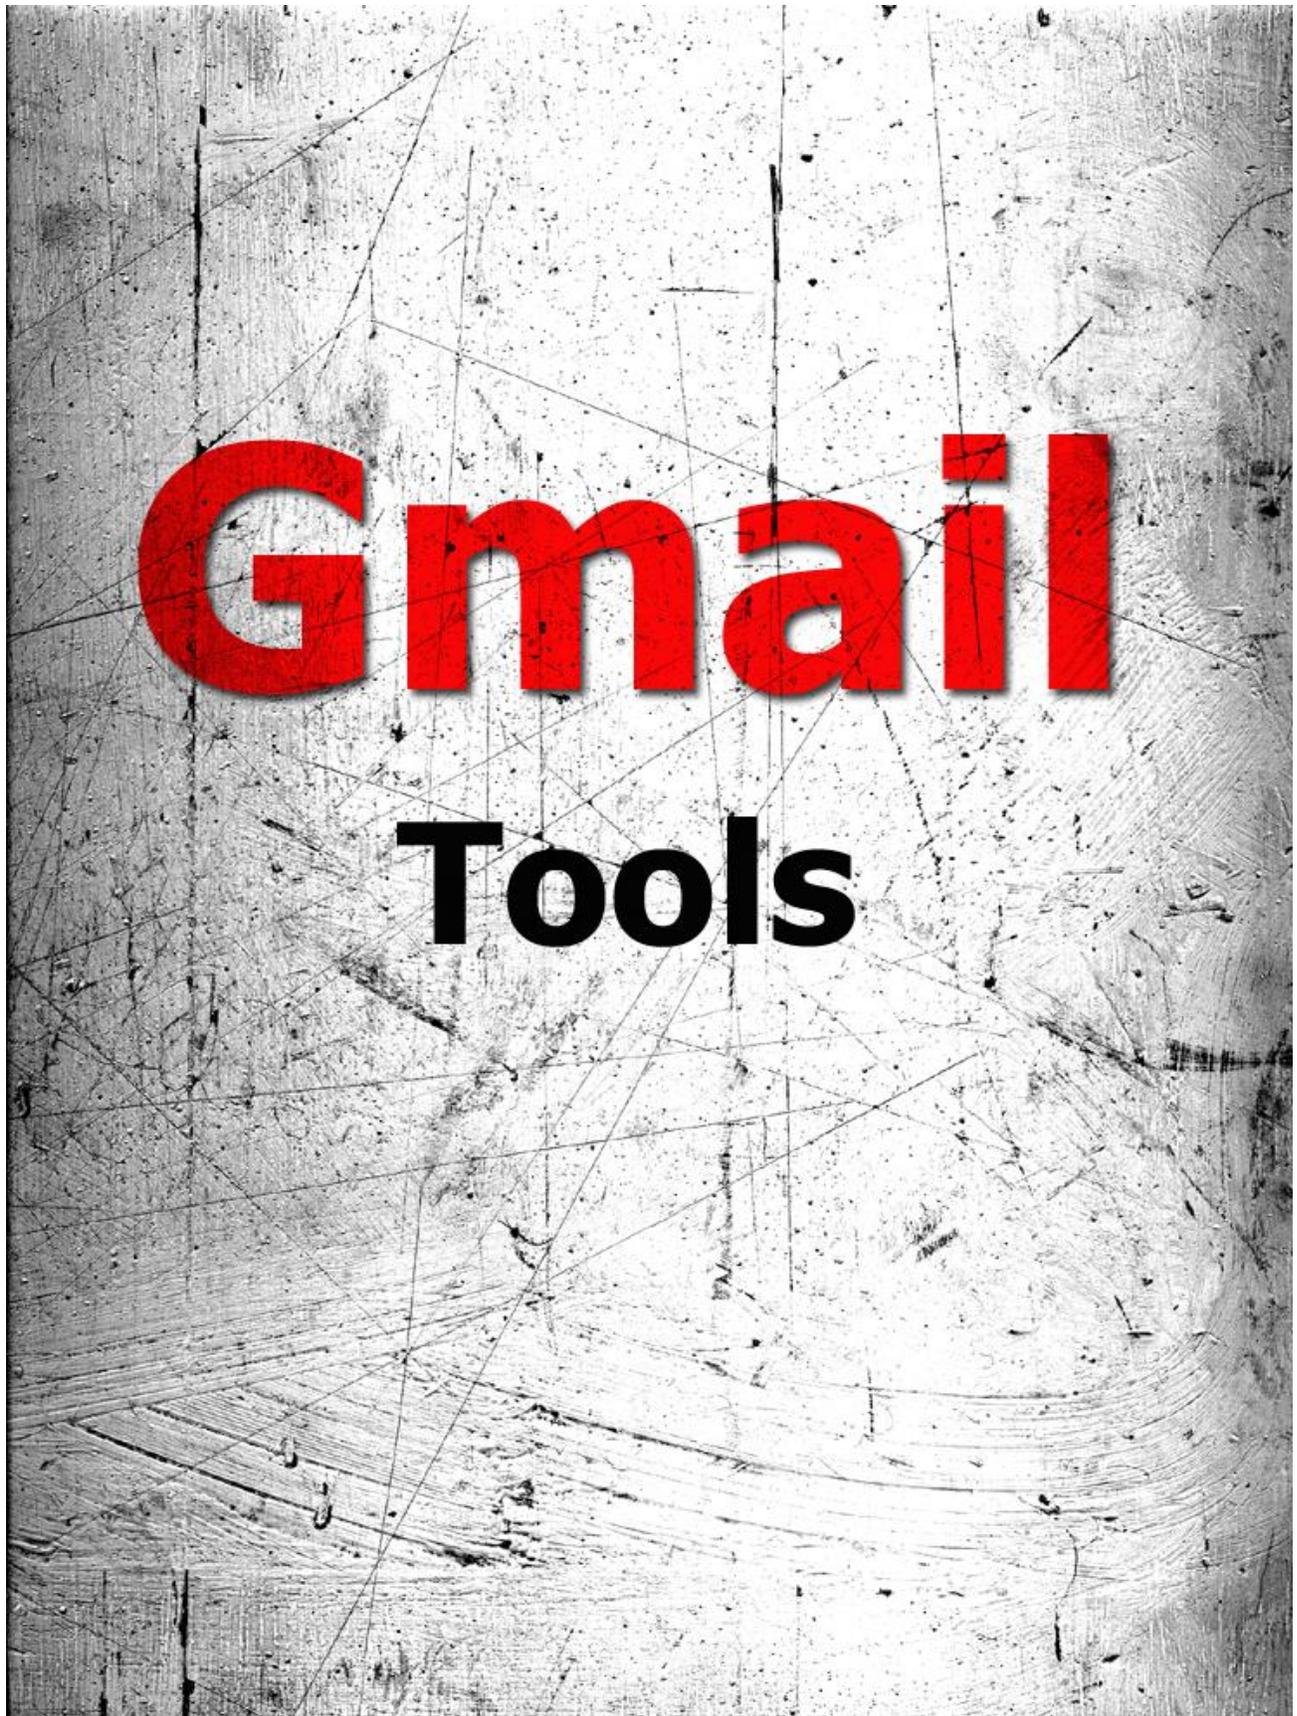

Now, hit on “Save As” and select the location where you want to save your keylogger server file.

And click on “**Compile Server**”. Now Compile has been done.

You have successfully created a keylogger server file. Now, simply send this file to your victim via email, once the victim runs our keylogger, we will key logs every 10 min via email.

How to Backup your Emails in to a Pen Drive (Mail Stores)

You can backup your All E-mail in to your PC or Pen drive by using Microsoft Outlook express. You can also use software that is **MailStore**, It is the best software for Email archiving and backup software .You can download Mailstore software from the official website of Mailstore.

Click on the .exe file at your USB stick and click on Archive E-mail.

Archive E-mail

 **Search E-mail**

 **Export E-mail**

 **Backup to CD or DVD**

 **Backup to HDD or USB**

 **Administrative Tools**

MailStore Home 4.2.0.5431

Enter Your Name Here

Archive Total Size: 7 messages
Disk Size: 14 MB

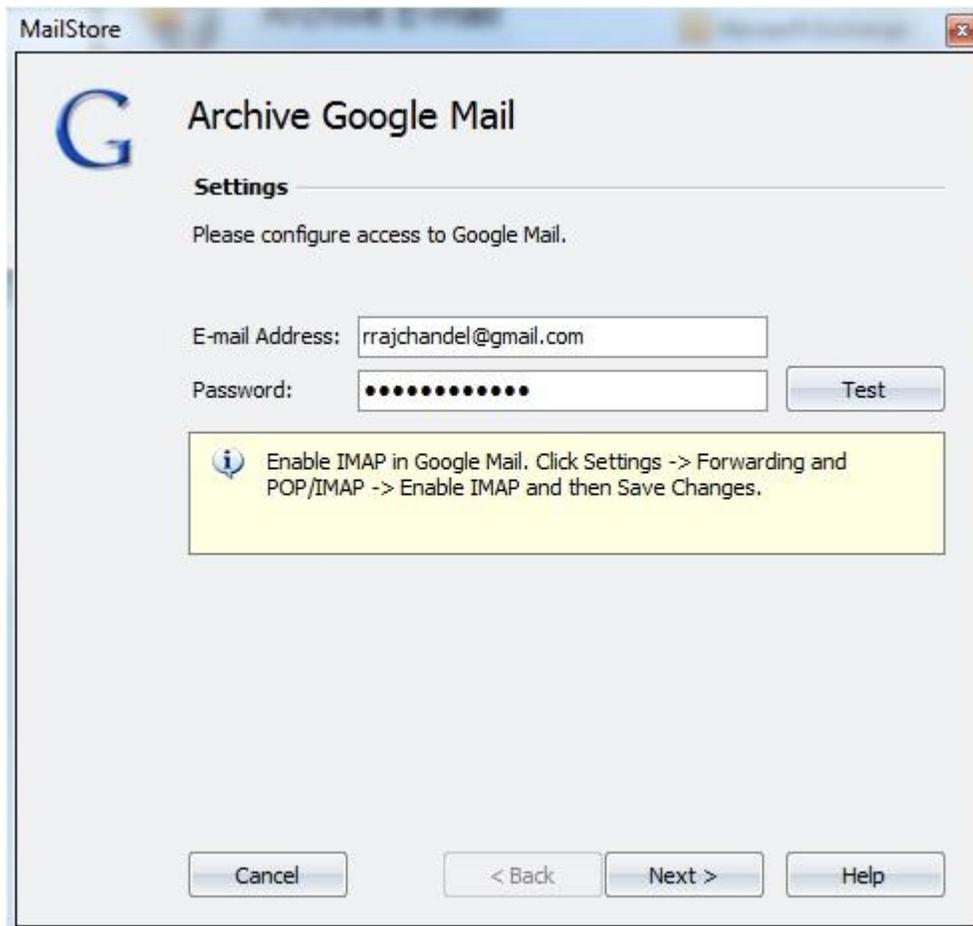

Self-Advertisement

Compared to the freeware MailStore Home for non-commercial single desktop usage, MailStore Server addresses companies wanting to safely store their employees' e-mail in a central archive. By doing this MailStore Server not only is able to archive existing mailboxes or files (e.g. Outlook PST), but can also archive all incoming and outgoing e-mail automatically. Employees can access the archive by either using an add-in for Microsoft Outlook, by using their internet browser or by using the intuitive client software for Windows. Learn more...

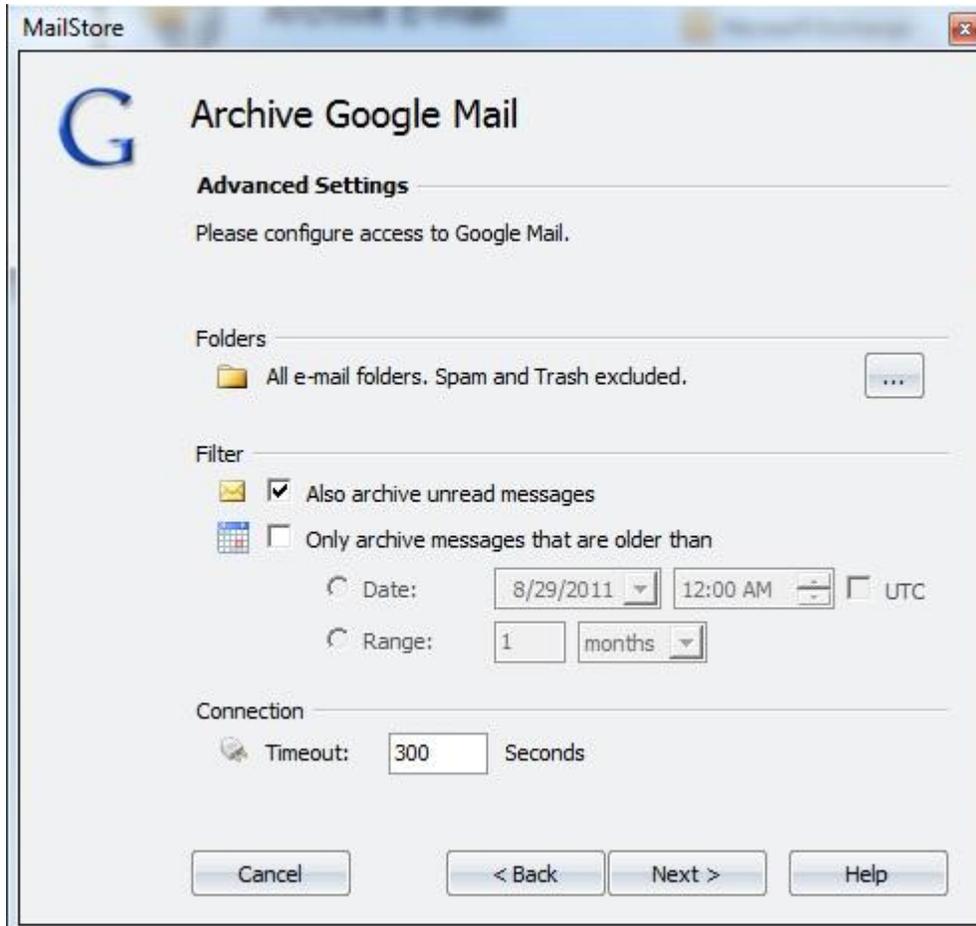

Click on Google mail.

Enter your email address and password. You can test the access of your account by clicking on the Test button.

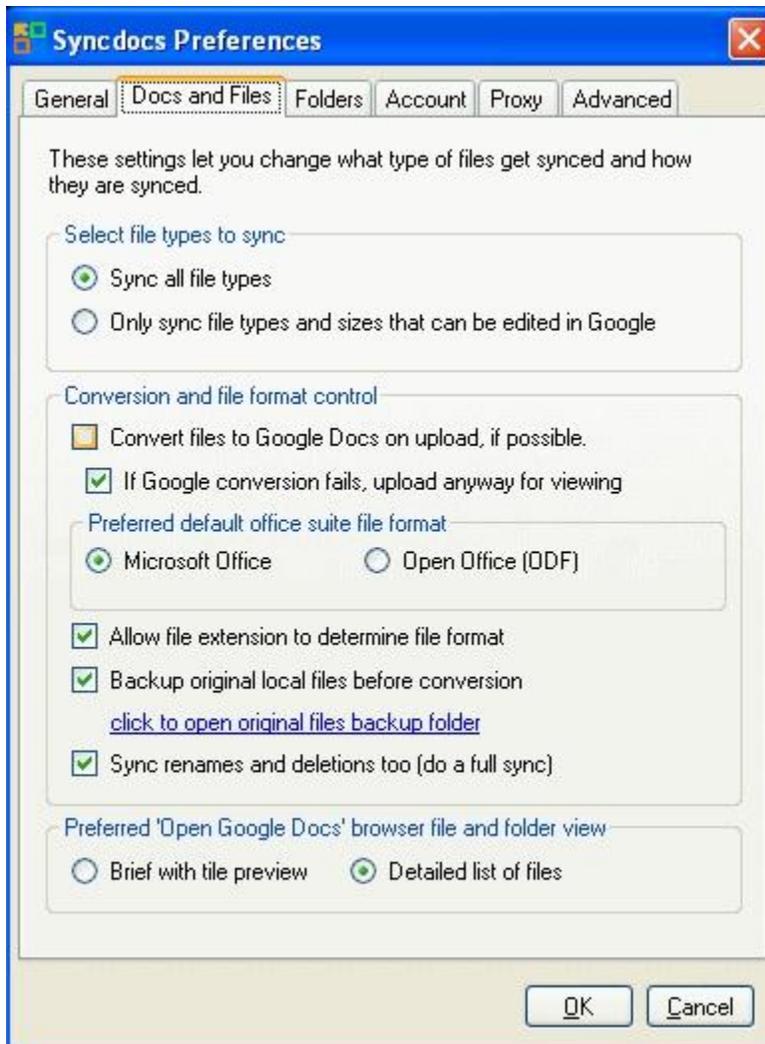

Click on Next. Here you can configure the backup options.

www.mailstore.com

Sync Docs

SyncDocs is a free program which allows you to synchronize files between your computer and your Google docs account. It is similar to what DropBox is for your other files.

<http://www.syncdocs.com/>

Use Gmail as a Hard Drive

Gmail Drive creates a virtual file system around your Google Mail account, allowing you to use Gmail as a storage medium.

http://www.filehippo.com/download_gmail_drive/

Gspace

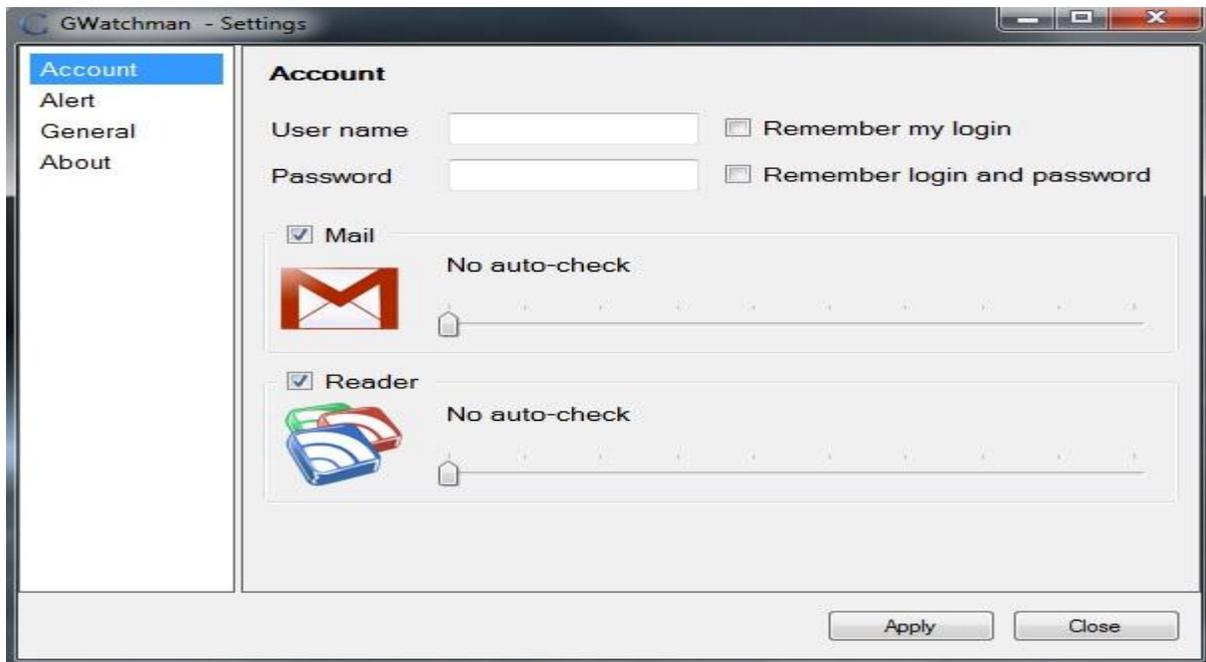

Gspace is a Firefox plugin that allows you to use your Gmail account for online storage. File extensions are not an issue; you can upload any type of file which includes music files to stream directly with this Firefox extension.
