ACKNOWLEDGEMENT

“For any successful work, it owes to thank many”

No one walks alone & when one is walking on the journey of life just where you start to thank those that joined you, walked beside you & helped you along the way.

Over the years, those that I have met & worked with have continuously urged me to write a book, to share me knowledge & skills on paper & to share my insights together with the secrets to my continual, positive approach to life and all that life throws at us. So at last, here it is.

So, perhaps this book & it's pages will be seen as “thanks” to the tens of thousands of you who have who have helped to make my life what is today.

Hard work, knowledge, dedication & positive attitude all are necessary to do any task successfully but one ingredient which is also very important than others is co-operation & guidance of experts & experienced person.

All the words is lexicon futile & meaningless if I fail to express my sense of regard to my parents & sister for their sacrifices, blessings, prayers, everlasting love & pain & belief in me.

I also want to thanks my friend **Ankit, Ankur & Sonal** for their support.

I solely claim all the responsibility for any shortcomings & limitations in this book.

Introduction

YouTube is a video-sharing website, created by three former PayPal employees in February of 2005, on which users can upload, share and view videos.

YouTube was founded by **Chad Hurley**, **Steve Chen**, and **Jawed Karim**, who were all early employees of PayPal.

According to a story that has often been repeated in the media, Hurley and Chen developed the idea for YouTube during the early months of 2005, after they had experienced difficulty sharing videos that had been shot at a dinner party at Chen's apartment in San Francisco. Karim did not attend the party and denied that it had occurred, while Hurley commented that the idea that YouTube was founded after a dinner party "was probably very strengthened by marketing ideas around creating a story that was very digestible"

YouTube began as a venture-funded technology startup, primarily from a \$11.5 million investment by Sequoia Capital between November 2005 and April 2006. YouTube's early headquarters were situated above a pizzeria and Japanese restaurant in San Mateo, California. The domain name **www.youtube.com** was activated on February 14, 2005, and the website was developed over the subsequent months.

"Feather" Beta

This is an opt-in beta for "Feather" support on YouTube. The "Feather" project is intended to serve YouTube video watch pages with the lowest latency possible. It achieves this by severely limiting the features available to the viewer and making use of advanced web techniques for reducing the total amount of bytes downloaded by the browser. It is a work in progress and may not work for all videos.
